Gentlemen:

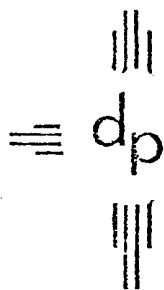

I have examined the application dated 5-5-77
for the Jerome P McHugh Nassau #6 J-36-27N-12W
Operator Lease and Well No. Unit, S-T-R

and my recommendations are as follows:

approve

Yours very truly,

AR Kendrick

dugan production corp.

May 5, 1977

Joe D. Ramey
Secretary-Director
New Mexico Oil Conservation Commission
Box 2088
Santa Fe, NM 87501

Dear Mr. Ramey:

Under the provisions of NMOCC Order R-5359 we are requesting administrative approval for downhole commingling of Fruitland and Pictured Cliffs production on the well listed below for the following reasons:

Operator	Well Name and Number	Location
Jerome P. McHugh	Nasasa #6	J-36-27N-12W

1. The bottom-hole pressure is estimated to be

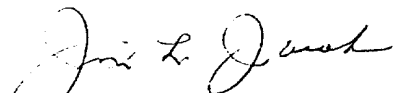

375 psig for the Fruitland formation, and
325 psig for the Pictured Cliffs formation.

2. Both zones will be marginal producers with

250 MCFGPD estimated for the Fruitland formation, and
100 MCFGPD estimated for the Pictured Cliffs formation.

We believe the granting of this request will permit the production of marginal reserves from both formations and not result in waste.

Sincerely,

Jim L. Jacobs
