Attn: Mr. W. G. Rabe

Dear Mr. Rabe:

On December 7, 1962 we sent you oil production information for the R & G Drilling Company #41 Hammond well for the years 1960, 1961 and 1962. At that time I told you that I was referring your letter to our Santa Fe office to check a figure shown in the New Mexico Oil and Gas Engineering Committee Annual Report. The engineering committee report indicated that in the month of April, 1959 the #41 Hammond well produced 8240 barrels of oil.

However I am mailing a copy of the operator's production report which I have received from Santa Fe which indicates that this was in error, as the #41 Hammond did not produce any oil during that month.

If we can be of any further service, please contact us.

Yours very truly

Emery C. Arnold
Supervisor, District #3
