~~Notice of intent to run tubing~~ XX

(INDICATE ABOVE BY CHECK MARK NATURE OF REPORT, NOTICE, OR OTHER DATA)

February 22

, 19 62

Well No. 3 is located 790 ft. from N line and 790 ft. from W line of sec. 26

Sec. 26 (1/4 Sec. and Sec. No.) 27N (Twp.) 11W (Range) R4PE (Meridian)
East Rio Canyon (Field) San Juan (County or Subdivision) New Mexico (State or Territory)

The elevation of the derrick floor above sea level is 6409 ft. GT.

DETAILS OF WORK

(State names of and expected depths to objective sands; show sizes, weights, and lengths of proposed casings; indicate mudding jobs, cementing points, and all other important proposed work)

Administrative Order 77-9 was issued authorizing the completion of this well as tubingless in 4 1/2" casing. The well has a high distillate ratio which causes the well to load up during flow periods, thereby decreasing the flow rate. It is now proposed to run approximately 6600' of 2" RFE 4.70# 2-5 1/2 5-8 Tbd. tubing in this well to increase the flow rate.

I understand that this plan of work must receive approval in writing by the Geological Survey before operations may be commenced.
