Re: Production Status Report
Marion #38, E-23-27N-8W

Dear Bill:

Attached is subject report you requested.

I used the allowable and production values from the Gas Proration Schedules and supplement NW 7878 where indicated. I did not seek a supplement showing the curtailment volume of 5531 MCF which should have been mailed from Santa Fe about October 1, 1963.

The curtailment and new status values after August do not include the 5531 MCF curtailment volume, but the net status and net allowable values do.

All production volumes shown were taken from El Paso's Forms C-114 and not from your forms C-115 when the schedules were made.

I hope this may explain the present status of the well.

Yours very truly

A. R. Kendrick
Engineer, District #3
