(Field)

San Juan  
(County or Subdivision)

New Mexico  
(State or Territory)

The elevation of the derrick floor above sea level is 6741 ft.

DETAILS OF WORK

(State names of and expected depths to objective sands; show sizes, weights, and lengths of proposed casings; indicate mudding jobs, cementing points, and all other important proposed work)

This well was originally intended to be completed in the Mesa Verde formation. Subsequent events, however, have brought about a change in plans. It is now intended to dually complete this well in the Mesa Verde and Pictured Cliffs formations, perforating and fracturing all possible productive zones in said formations. Casing program remains unchanged from original intentions.

The E/2 of Section 17 is dedicated to the Mesa Verde formation.  
The NE/4 of Section 17 is dedicated to the Pictured Cliffs formation.

E/2 & NE/4: NM 03380

I understand that this plan of work must receive approval in writing by the Geological Survey before operations may be commenced.

Company El Paso Natural Gas Company
