DETAILS OF WORK

(State names of and expected depths to objective sands; show sizes, weights, and lengths of proposed casings; add all other important proposed work)

On September 29, 1951, at 11:30 A.M. casing was run in at 2337 feet with 75 sacks of cement. Rotary rig was moved off and cable tool rig was moved on to drill cement plug and pay. On September 29, 1951, hole was bailed dry and remained dry for two hours. Drilled 184 feet of solid cement in bottom of pipe and hole again bailed dry. Hole remained dry for four hours which was considered a satisfactory water shut-off test.

I understand that this plan of work must receive approval in writing by the Geological Survey before operations may be commenced.
