(State or Territory)

The elevation of the derrick floor above sea level is 6009 ft. (0.1.1)

DETAILS OF WORK

(State names of and expected depths to objective sands; show sizes, weights, and lengths of proposed casings; indicate mudding jobs, cementing points, and all other important proposed work)

Well has been drilled to total depth of 6000 feet with rotary tools.

It is now proposed to drill well to approximate depth of 7000 feet to test strata and any other formation encountered.

I understand that this plan of work must receive approval in writing by the Geological Survey before operations may be commenced.
