11PM
(Meridian)

West Kutz Canyon
(Field)

San Juan
(County or Subdivision)

New Mexico
(State or Territory)

The elevation of the derrick floor above sea level is 5944 ft.

DETAILS OF WORK

(State names of and expected depths to objective sands; show sizes, weights, and lengths of proposed casings; indicate muddling jobs, cementing points, and all other important proposed work)

The well was shot 8-1-51 with 250 qts. of solidified nitro glycerin from 1558-1646.

The shot went off on time and the calseal plug was drilled and the well cleaned out to bottom. The well was estimated to be making 3-1/2 mil. cu. ft. gas.

I understand that this plan of work must receive approval in writing by the Geological Survey before operations may be commenced.
