DE.	TAILS OF WORK
ing points, and	4
Marian Marian	. 1 1000 and drilled to 377'. 9-5/8" easing
Spudded 12-1/4" hole on Nevember	r 1, 1959 and drilled to 377'. 9-5/8" engine
Spudded 12-1/4" hole on November was set at 377' with 200 sanks	r 1, 1959 and drilled to 377'. 9-5/8" easing coment containing 2% colsium chloride. Comes coment, caning and water what off were tooted
Spudded 12-1/4" hole on November was set at 377' with 200 sanks	r 1, 1959 and drilled to 377'. 9-5/8" easing coment containing 2% colsium chloride. Comes coment, caning and water what off were tooted
Spudded 12-1/4" hole on Nevember was set at 377' with 200 seeks of roulated. After waiting on each 1000 per which hald with me	r 1, 1959 and drilled to 377'. 9-5/8" easing sement containing 2% colsium chloride. Comes casent, easing and water chut off were tested o indication of pressure drop. Reduced bale
Spudded 12-1/4" hole on Nevember was set at 377' with 200 seeks of rouleted. After waiting on each 1000 per which held with me	r 1, 1959 and drilled to 377'. 9-5/8" easing coment containing 2% colsium chloride. Comes coment, caning and water chut off were tooted
Spudded 12-1/4" hole on Nevember was set at 377" with 200 seeks of circulated. After waiting on each 1000 per which held with me	r 1, 1959 and drilled to 377'. 9-5/8" easing sement containing 2% colsium chloride. Comes casent, easing and water chut off were tested o indication of pressure drop. Reduced bale
Spudded 12-1/4" hole on Nevember was set at 377' with 200 seeks of rouleted. After waiting on each 1000 per which held with me	r 1, 1959 and drilled to 377'. 9-5/8" easing sement containing 2% colsium chloride. Comes casent, easing and water chut off were tested o indication of pressure drop. Reduced bale
Spudded 12-1/4" hole on Nevember was set at 377' with 200 seeks of rouleted. After waiting on each 1000 per which held with me	r 1, 1959 and drilled to 377'. 9-5/8" easing sement containing 2% colsium chloride. Comes casent, easing and water chut off were tested o indication of pressure drop. Reduced bale
Spudded 12-1/4" hole on Nevember was set at 377' with 200 seeks of rouleted. After waiting on each 1000 per which held with me	r 1, 1959 and drilled to 377'. 9-5/8" easing sement containing 2% colsium chloride. Comes casent, easing and water chut off were tested o indication of pressure drop. Reduced bale
Spudded 12-1/4" hole on Nevember was set at 377' with 200 seeks of circulated. After waiting on or with 1000 per which held with me	r 1, 1959 and drilled to 377'. 9-5/8" easing sement containing 2% colsium chloride. Comes casent, easing and water chut off were tested o indication of pressure drop. Reduced bale
Spudded 12-1/4" hole on Nevember was set at 377' with 200 seeks of circulated. After waiting on or with 1000 per which held with me	r 1, 1959 and drilled to 377'. 9-5/8" easing coment containing 2% colcium chloride. Coment coment, easing and water chut off were tected a indication of pressure drop. Reduced hole rilling operations.
Spudded 12-1/4" hole on Nevember was set at 377' with 200 seeks of rouleted. After waiting on each 1000 per which held with me	r 1, 1959 and drilled to 377'. 9-5/8" easing sement containing 2% colsium chloride. Comes casent, easing and water chut off were tested o indication of pressure drop. Reduced bale
Spudded 12-1/4" hole on Nevember was set at 377' with 200 seeks of rouleted. After waiting on each 1000 per which held with me	r 1, 1959 and drilled to 377'. 9-5/8" easing sement containing 2% colsium chloride. Comes count, easing and water chut off were tected a indication of pressure drop. Reduced hale rilling operations.
Spudded 12-1/4" hole on November was set at 377' with 200 seeks of circulated. After waiting on equitin 1000 pei which held with me 7-7/8" at 377' and resumed di	r 1, 1959 and drilled to 377'. 9-5/8" easing senent containing 2% coldium chloride. Comes cases, easing and water chut off were tected a indication of pressure drop. Reduced hole rilling operations.
Spudded 12-1/4" hole on Nevember was set at 377" with 200 seeks of roulated. After waiting on earth 1000 pel which held with me to 7-7/8" at 377" and resumed di	r 1, 1959 and drilled to 377'. 9-5/8" easing sement containing 2% coleium chloride. Comes count, easing and water chut off were tested o indication of pressure drop. Reduced bole rilling operations.
Specified 12-1/4" hole on November was set at 377' with 200 seeks of realisted. After waiting on each to 1000 pei which held with me to 7-7/8" at 377' and receive approximate the second of the secon	r 1, 1959 and drilled to 377'. 9-5/8" easing sement containing 2% colcium chloride. Comes count, easing and water chut off were tested o indication of pressure drep. Reduced hole willing operations.
Specified 12-1/4" hole on November was set at 377' with 200 seaks of realisted. After waiting on exitin 1000 pei which held with me 7-7/8" at 377' and receive appropriately particular formation of the plan of work must receive appropriately particular formation for the plan of work must receive appropriately particular formation for the plan of work must receive appropriately particular formation for the plan of work must receive appropriately particular formation for the plan of work must receive appropriately particular formation for the plan of work must receive appropriately particular formation for the plan of work must receive appropriately particular formation for the plan of work must receive appropriately particular formation for the plan of t	ement centaining 2% colcium chloride. Comercent, casing and water chut off were tected o indication of presence drep. Reduced hale rilling operations. Only 1 2 1995 Oral in writing by the Geological Survey before operations may be commenced.
Specified 12-1/4" hole on November was set at 377' with 200 seaks of realisted. After waiting on earth 1000 pei which held with me 7-7/8" at 577' and resumed di	ement centaining 2% colcium chloride. Comercent, casing and water chut off were tected o indication of presence drep. Reduced hale rilling operations. Only 1 2 1995 Oral in writing by the Geological Survey before operations may be commenced.
Specified 12-1/4" hole on November was set at 377' with 200 seaks of realisted. After waiting on each with 1000 pei which held with me 7-7/8" at 377' and receive approach to 7-7/8" at 377' and receive approach and a series Petroleum Company Address Dex 487	ement centaining 2% coloium chloride. Coment centaining 2% coloium chloride. Coment cent, excise and water chut off were tected intication of presence drop. Reduced halo willing operations. Onliginal Signed By R. M. Bauer, Jr.
Specified 12-1/4" hole on November was set at 377' with 200 seaks of realisted. After waiting on exitin 1000 pei which held with me 7-7/8" at 377' and receive approximately and the second distribution of the second distribution distribution of the second distribution of the second distribution of the second distribution of the second distribution distribution of the second distribution	r 1, 1959 and drilled to 377'. 9-5/8" easing senent centaining 2% colcium chloride. Comes cannot, easing and water chut off were tected o indication of presence drep. Reduced hale rilling operations. Original in writing by the Geological Survey before operations may be commenced.
Spudded 12-1/4" hole on November was set at 377' with 200 seeks of realisted. After waiting on each with 1000 pei which held with me to 7-7/8" at 377' and receive approaches Pan American Potroleum Conductors.	coment containing 2% colcium chloride. Comes count, casing and water chut off were tested o indication of pressure drop. Reduced hale willing operations. Only 1 2 1255 Oval in writing by the Geological Survey before operations may be commenced. Sporetion ORIGINAL SIGNED BY R. M. Bauer, Jr.
