Farrington, New Mexico, September 10 1951

Well No. 2 is located 1570 ft. from S line and 1550 ft. from W line of sec. 5

2/4 of Section 5 (1/4 Sec. and Sec. No.)
1-27-4 (Twp.) 4-10-4 (Range) 105° E (Meridian)
Pleicher-Eats (Field) San Juan (County or Subdivision) New Mexico (State or Territory)

The elevation of the derrick floor above sea level is 5273 ft. (U.S.)

DETAILS OF WORK

(State names of and expected depths to objective sands; show sizes, weights, and lengths of proposed casings; indicate mudding jobs, cementing points, and all other important proposed work)

On August 27, at 6:07 P.M., 5 1/2" casing was set at 1767 feet with 75 sacks of cement. Rotary rig was moved off location and cable tool rig rigged up for drilling cement plug and pay. On September 4, hole was bailed dry and remained dry for two hours. Thirty-two feet of solid cement was then drilled in bottom of pipe and hole again bailed dry. Hole remained dry for two hours which was considered a satisfactory water shut-off test.

I understand that this plan of work must receive approval in writing by the Geological Survey before operations may be commenced.
