DETAILS OF WORK

(State names of and expected depths to objective sands; show sizes, weights, and lengths of proposed casings; indicate mudding jobs, cementing points, and all other important proposed work)

Drill well to test Dakota at 1500' with Rotary tools.

Drill 5 1/8" hole and if oil is encountered in Dakota a long string of 5 1/8" casing will be cemented with cement on top of the Dakota.

I understand that this plan of work must receive approval in writing by the Geological Survey before operations may be commenced.
