Farmington, New Mexico February 20, 19 61

Well No. 10 is located 1620 ft. from N line and 1160 ft. from E line of sec. 1
SW/4 NW/4 Section 1 T-27-N R-11-W N.M.P.M.
(1/4 Sec. and Sec. No.) (Twp.) (Range) (Meridian)
San Juan New Mexico
(Field) (County or Subdivision) (State or Territory)

The elevation of the derrick floor above sea level is _____ ft. (To be reported later.)

DETAILS OF WORK

(State names of and expected depths to objective sands; show sizes, weights, and lengths of proposed casings; indicate mudlogging jobs, cementing points, and all other important proposed work.)
We propose to drill the above well to an approximate total depth of 6400' with rotary tools to evaluate Dakota prospects. Stimulation and completion will be as indicated upon reaching total depth. The following casing program is proposed:

SIZE	DEPTH	CEMENT	REMARKS
8-5/8"	350'	275 cu	Test - circulate.
4-1/2"	6400'		Casing will be cemented by 2-stage method with stage tool set approximately 150' below base of Pictured Cliffs. First stage will consist of sufficient cement to fill 500' above top of Gallup. Second stage will consist of sufficient cement to fill 300' above top of Pictured Cliffs.

A copy of any survey taken will be submitted upon completion of well. Copies of location plate attached.

I understand that this plan of work must receive approval in writing by the Geological Survey before operations are commenced.
