Re: Graham Federal #1; A-06-27N-11W

Dear Sirs:

One area of interest was left out on your intent to plug and abandon. There is a Chacra zone from 2725' to 2775' that is very porous. It may be wet, but that is all the moe reason to put a plug across it. The plug should be a minimum from 2700'-2800', inside and outside the casing. Also, a ten-sack surface plug with marker was left out.

If you have any questions please call this office.

Yours truly,

A handwritten signature in cursive script that reads "Jeff A. Edmister".
