The British-American Oil Producing Co.
P. O. Box 180
Denver 1, Colorado

Attention: Mr. Thomas M. Hobb

Administrative Order NSL-246

Gentlemen:

Reference is made to your application for approval of an unorthodox well location for your Fullerton Well No. 8 located 1500 feet from the North line and 1800 feet from the East line of Section 14, Township 27 North, Range 11, West, undesignated Gallup Pool, San Juan County, New Mexico.

It is our understanding that this unorthodox well location is based upon extreme topographic conditions in the area.

By authority granted me under provisions of Rule 104 (f) of the Commission Rules and Regulations, you are hereby granted approval for the above described unorthodox well location. You must also obtain like approval from the U. S. Geological Survey if the well is located on land subject to the jurisdiction of the U. S. Geological Survey.

Very truly yours,

A. L. PORTER, Jr.,
Secretary-Director

1. The first step in the process of creating a new product is to identify a market need. This involves conducting market research to determine what consumers want and what problems they are trying to solve. Once a need is identified, the next step is to develop a concept that addresses that need. This is often done through brainstorming sessions with a team of designers and engineers. The concept is then refined through prototyping and testing, with feedback from potential users being used to make improvements. Finally, the product is launched into the market, and its success is monitored through sales data and customer feedback.
