13. Describe Proposed or Completed Operations

It is intended to deepen the existing PC open hole by pulling the 1" tubing and drilling to new total depth of approximately 2345'. A 2-7/8" longstring (casing) will be ran to surface and cemented with approximately 110 sxs of Class B cement. The PC formation will be selectively perforated and stimulated. The well will be returned to production as a slimhole without tubing.

14. I hereby certify that the foregoing is true and correct.
