13. Describe Proposed or Completed Operation (clearly state all pertinent details, including estimated starting date of any proposed work and approximate duration thereof. If the proposal is to deepen directionally or recompleate horizontally, give subsurface locations and measured and true vertical depths of all pertinent markers and zones. Attach the Bond under which the work will be performed or provide the Bond No. on file with BLM/BIA. Required subsequent reports shall be filed within 30 days following completion of the involved operations. If the operation results in a multiple completion or recompleation in a new interval, a Form 3160-4 shall be filed once testing has been completed. Final Abandonment Notices shall be filed only after all requirements, including reclamation, have been completed, and the operator has determined that the site is ready for final inspection.)

Please reference telephone conversation on May 17, 2002, between representatives of BP America and Steve Mason, BLM and Charlie Perrin, NMOCD, regarding bringing various inactive wells into compliance.
The subject well was approved for plug and abandonment on 03/14/2000. Verbal permission was granted to temporarily abandon the well (i.e. pressure test for casing integrity) in order to bring well into compliance and hold for possible production stimulation in the current zone or recompleation into the Fruitland Coal Formation.
BP America attempted to perform casing integrity test on the well, however, the Tapp LS 8 failed pressure test (CSG leak located @ 1740') & well is to be P&A'd as follows:
- MIRU workover rig
- RIH w/CIBP & set @2775'. Spot 700' of cement on top of CIBP to cover Picture Cliffs, & Fruitland Coals. Ojo Alamo to 1791'
