13. Describe Proposed or Completed Operations (Clearly state all pertinent details, and give pertinent dates, including estimated date of starting any proposed work. If well is directionally drilled, give subsurface locations and measured and true vertical depths for all markers and zones pertinent to this work.)*

Please refer to your letter dated August 7, 1998.

We request permission for continued long term shut in for this well. It remains remote relative to pipelines in the area. If it's proximity to pipelines changes or if gas prices significantly improve we would consider connecting and producing this well.

We also request that the casing integrity test requirement be waived. The cement job on the production casing circulated cement to surface, therefore, the casing should be fully protected from corrosion and all uphole formations should be isolated.
