Marathon requests a 30-day extension for gas flaring to complete the testing of the well. This well was perforated and fracture stimulated on July 18-19. The well produced no gas and was squeezed w/34 sx of cement on August 9, 1990. On August 14, 1990, the well was reperforated. After rod pumping the well for six (6) days, the formation started producing gas on August 23, 1990. Verbal approval to flare the gas was granted by Kenny Howell on August 27, 1990.
