13. Describe Proposed or Completed Operations (Clearly state all pertinent details, and give pertinent dates, including estimated date of starting any proposed work. If well is directionally drilled, give subsurface locations and measured and true vertical depths for all markers and zones pertinent to this work.)*

Upon the recommendation of Halliburton, Phoenix plans to utilize the single stage foamed cementing process to cement the 4-1/2" casing from T.D. to the surface. Phoenix plans to use about 880 sx - 50/50 POZ/STD cement with the first 630 sx foamed to 11.0#/gal density. The final 250 sx will not be foamed. This process should give zonal isolation superior to the two stage process we originally proposed.
