The elevation of the derrick floor above sea level is _____ ft. (Do not forget to add datum.)

DETAILS OF WORK

(State names of and expected depths to objective sands; show sizes, weights, and lengths of proposed casings; indicate mudding jobs, cementing points, and all other important proposed work)

We propose to drill the above well to a total depth of approximately 2200' with production anticipated from the Pictured Cliffs Formation. The well will be used to total depth.

The proposed coding program is as follows:

DATE	TIME	LOCATION	REMARKS
1-10	10:00	100	CLIMATE to surface
1-11	10:00	100	100

Copies of location plot are attached. Upon completion of this will copies of all logs taken will be forwarded.

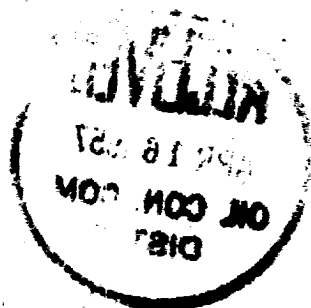

I understand that this plan of work must receive approval in writing by the Geological Survey before operations may be commenced.
