It is of the greatest importance to have a complete history of the well. Please state in detail the dates of redrilling, together with the reasons for the work and its results. If there were any changes made in the casing, state fully, and if any casing was taken back up or left in the well, state when and where. State well has been drilled, state date, size, position and number of shots. Pumps or bridges were put in to test for water, state kind of water, date, position, and results of pumping or bailing.

[illegible]

On April 27, 1957, 5-1/2" casing was landed at 230' and cemented with 100 sacks cement. After waiting on cement for 48 hours, casing and cement were tested with 1000 pounds pressure for 10 minutes with no drop in pressure. Sealing operations were done.

Perforated with four shots per foot 1951-52 and two shots per foot 1952-54. Sand water
Control with 25,000 gal. pump water and 35,000 pounds sand. Pumping broke at 1950
pounds. Average injection rate 43.2 BPM.

Preliminary test 1970 NOV 10 OIL ON C/S SWIDS ON ZONES

The summary on this page is for the condition of the well at above date.
