

NEW MEXICO OIL CONSERVATION COMMISSION
PACKER SETTING REPORT

I, William L. Heard, being of lawful age and having full
Name of party making report

knowledge of the facts hereinbelow set out do state:

That I am employed by El Paso Natural Gas Company in the capacity of
Assistant Area Drilling Supt., that on May 24,, 1965

I personally supervised the setting of a Baker Model N-1
Make & type of packer

in El Paso Natural Gas Co., Storey K-23-28-9
Operator of well *Lease name*

Well no. 8-C (IM) located in the So. Blanco P.C. and
Blanco Mesa Verde field,
San Juan county, state of New Mexico, at a subsurface depth of

3273 feet, said depth measurement having been furnished me by
Tubing measurement.

That the purpose of setting this packer was to effect a seal in the annular space between two strings of pipe where the packer was set so as to prevent the commingling, in the bore of this well, of fluids produced from a stratum below the packer with fluids produced from a stratum above the packer; that this packer was properly set and that it did, when set, effectively and absolutely seal off the annular space between the two strings of pipe where it was set in such manner as to prevent any movement of fluids across the packer.

W. L. Heard
(Signature)

Assistant Area Drilling Superintendent
