DETAILS OF WORK

(State names of and expected depths to objective sands; show sizes, weights, and lengths of proposed casings; indicate mudding jobs, cementing points, and all other important proposed work)

Fred Fessel "J" Well No. 1 was spudded on July 24, 1959 and on July 25, 1959 9-5/8" casing was set at 361' with 150 sacks cement with 3% calcium chloride. Circulated cement. After waiting on cement casing and water shut off were tested with 800 pounds pressure for thirty minutes, which held with no drop in pressure. Reduced hole to 9-1/4" at 361' and resumed drilling operations.

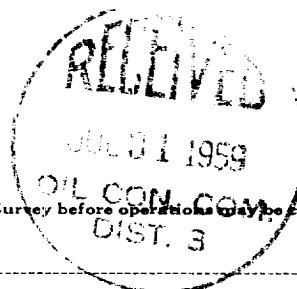

I understand that this plan of work must receive approval in writing by the Geological Survey before operations may be commenced.
