DETAILS OF WORK

(State names of and expected depths to objective sands; show sizes, weights, and lengths of proposed casings; indicate mudding jobs, cementing points, and all other important proposed work)

The Mesa Verde production of this well is non-commercial; therefore, it is intended to plug back to the Pictured Cliffs formation. It is intended to set a retainer and squeeze the Mesa Verde formation with 100 sacks cement. This well will not be a dual completion therefore, the name will be changed from the Lackey #9-B (FM) to the Lackey #9-B.

I understand that this plan of work must receive approval in writing by the Geological Survey before operation may be commenced.
