Per the attached letter from the BLM, Cross Timbers Operating Company requests continued shut-in status for this well. In October, 1999, the well was tested with a temporary test compressor @ 36 MCFD. The well passed a bradenhead test on 8/31/00 (attached). CTOC is evaluating either installing rod pumping equipment and a compressor on the well or plugging it and drilling a replacement well. CTOC requests the well be allowed to be maintained as shut-in until we finish with our evaluation.
