Dear Ms. Wrotenbery,

This is a request for administrative approval for downhole commingling of the production from the Basin Fruitland Coal and Fulcher Kutz Pictured Cliffs pools.

I have attached for your review, an acreage plat outlining the dedicated acreage, offset wells and offset operators. I have also included a proposed allocation formula with a short discussion of the history of the well.

The offset operators are being notified of this application by certified return receipt mail. Copies of these letters are enclosed.

Thank you for your consideration and approval of this application. If you have any questions please do not hesitate to call upon me.

Sincerely,

Paul C. Thompson, P.E.

Allocation Formula

The Fulcher Kutz Pictured Cliffs formation was completed by Petroleum Corp. of Texas, on November 19, 1953. The Pictured Cliffs was completed openhole and shot with 428 quarts of SNG. The well produced steadily until the mid 1980's when the reservoir pressure declined level of the pipeline pressure. The well would only produce when line pressures were low until July of 1993 when the Pictured Cliffs was abandoned and the Fruitland Coal was completed. The decline curves for both formations are attached.

Since the Pictured Cliffs appears to only be capable of marginal production, Thompson Engineering proposes to downhole commingle the production from both zones.

Both zones have very similar bottom hole pressures so cross flow will not be a factor. The last recorded pressure for the Pictured Cliffs was 150 psi in 1991 after a 7 days build up. The Fruitland Coal was measured at 65 psi after a 24 hour buildup in 1998. Neither zone produces a significant amount water (less than 1 bbls/week) and neither zone produces any liquid hydrocarbons. Neither zone is fluid sensitive and the fluids from the two zones are compatible.

The Pictured Cliffs formation was producing approximately 16 MCF/D when it was abandoned in 1993. The Fruitland Coal produced an average of 168 MCFD during 1998. Based on these rates, the proposed allocation is 91.0% to the Fruitland Coal and 9.0% to the Pictured Cliffs.
