*Administrative Order NSL-3155*

Dear Ms. Bradfield:

Reference is made to your application dated August 20, 1992 for a non-standard Basin-Fruitland coal gas well location for your existing McClanahan Well No. 6 which was drilled in 1956 and completed in the Fulcher Kutz Pictured Cliffs Pool at a standard gas well location 1850 feet from the South line and 1500 feet from the West line (Unit F) of Section 23, Township 28 North, Range 10 West, NMPM, San Juan County, New Mexico

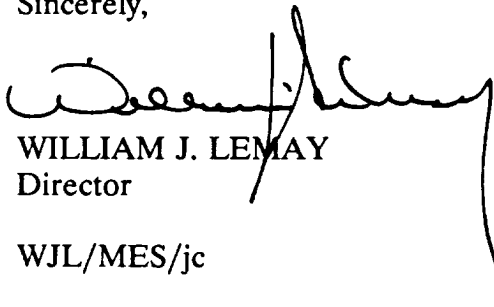

It is my understanding that the Pictured Cliffs zone is to be downhole commingled with the Basin Fruitland Coal Gas Pool, and pursuant to the Special Rules and Regulations for the Basin Fruitland Coal Gas Pool, as promulgated by Division Order No. R-8768, as amended, said location is considered to be unorthodox.

By the authority granted me under the provisions of Rule 8 of said Order No. R-8768, as amended, the above-described unorthodox coal gas well location is hereby approved. Further, the N/2 of said Section 23 shall be dedicated to said well forming a standard 320-acre gas spacing and proration unit for said pool.
