J. F. Day #28 Farrington, New Mexico July 3, 19 59

Well No. 1 is located 790 ft. from N line and 1850 ft. from E line of sec. 20

R. 4 Section 20 1-25N 10E RMT
(1/4 Sec. and Sec. No.) (Twp.) (Range) (Meridian)

Angels Peak Dakota San Juan New Mexico
(Field) (County or Subdivision) (State or Territory)

The elevation of the derrick floor above sea level is 6026 ft.

DETAILS OF WORK

(State names of and expected depths to objective sands; show sizes, weights, and lengths of proposed casings; indicate mudding jobs, cementing points, and all other important proposed work)

On June 29, 1959, 5-1/2" casing was set at 6662 feet and cemented in two stages. First stage with 350 sacks 6% gel cement mixed with 1-1/2 pounds tef-plug per sack followed by 100 sacks neat cement. With staging tool set at 2354, cemented second stage with 250 sacks 4% gel cement. After waiting on cement, tested casing with 2500 psi for 30 minutes with no indicated pressure drop. Resumed completion operations.

I understand that this plan of work must receive approval in writing by the Geological Survey before operations may be commenced.
