DETAILS OF WORK

(State names of and expected depths to objective sands; show sizes, weights, and lengths of proposed casings; indicate mudding jobs, cementing points, and all other important proposed work)

This is to notify you of change of plans from notice of intention to drill previously filed. We plan to set approximately 625' of 8 5/8" surface csg, rather than 200' as stated before. This csg will then be cemented with sufficient cement to circulate.

I understand that this plan of work must receive approval in writing by the Geological Survey before operations may be commenced.
