DETAILS OF WORK

(State names of and expected depths to objective sands; show sizes, weights, and lengths of proposed casings; indicate mudding jobs, cementing points, and all other important proposed work)

This well was spudded on May 8, 1957, and on May 9, 1957, 10-3/4" casing was set at 229' with 170 sacks cement. After waiting on cement for 24 hours casing and water shut-off were tested with 800 pounds for 30 minutes with no drop in pressure.

On May 13, 1957, 7-5/8" casing was landed at 2139' and cemented with 170 sacks cement. After waiting on cement for 24 hours casing and water shut-off were tested with 1000 pounds for 30 minutes with no drop in pressure.

On May 19, 1957, 5-1/2" casing was set at 4645' with 120 sacks cement. After waiting on cement for 24 hours, casing and water shut-off were tested with 800 pounds for 30 minutes with no drop in pressure. Completion operations were completed.

I understand that this plan of work must receive approval in writing by the Geological Survey before operations may be commenced.
