**Lackey B LS 8
Downhole Commingle
July 21, 1998**

API Code: 300451325400

DHC# 1262

Location: Sec. 20, T – 28N, R – 9W, 890' FNL, 990' FEL, San Juan County.

Funds in the amount of \$20,000 are requested to downhole commingle the Lackey B LS 8. Downhole commingle of this well has been approved. An expected uplift of 50 Mcfgd should be derived from downhole commingling the Pictured Cliffs (PC) and Mesaverde Point Lookout zones in this well.

Work Plan

Pull tubing strings, mill and pull packer, run production tubing to produce both zones together, and optimize with plunger lift.

NOTE: To pull Baker Model "E" latch assembly on long string, rotate 10–12 turns right. Since this completion was run in 1957 you will probably just have to pull up and hope it shear releases.
