Gentlemen:

We received your memo concerning initial deliverability and shut in pressure test report not being filed on the above well and are at a loss to determine why it had not been. We are checking into the matter and hope that we can have the answer to this in the next day or two.

Shortly after this well was put on the line, Mr. Neely, who was then operating these properties for us, advised us he was running a test and would file it with the Commission. We never received a copy and asked him if it had been filed and he assured us that it had and that a copy would be coming from your office. Apparently this test has never been filed and we will, if we can, get it to your office in the near future.

Yours very truly,

F. F. Dueser
F. F. Dueser
