13. Describe Proposed or Completed Operation (clearly state all pertinent details, including estimated starting date of any proposed work and approximate duration thereof. If the proposal is to deepen directionally or recompleat horizontally, give subsurface locations and measured and true vertical depths of all pertinent markers and zones. Attach the Bond under which the work will be performed or provide the Bond No. on file with BLM/BIA. Required subsequent reports shall be filed within 30 days following completion of the involved operations. If the operation results in a multiple completion or recompleat in a new interval, a Form 3160-4 shall be filed once testing has been completed. Final Abandonment Notices shall be filed only after all requirements, including reclamation, have been completed, and the operator has determined that the final site is ready for final inspection.)

It is proposed to surface commingle the Dakota and Pictured Cliffs formations in the subject well. This would allow the installation of a single set of facilities and one compressor to service both formations.

This well was approved to be downhole commingled on October 28, 1996. The work to downhole commingle the Dakota and Pictured Cliffs has never been completed. The information supplied in the original downhole commingling application has remained the same. The Pictured Cliffs is shut-in and the Dakota is producing at marginal rates. It is proposed the fixed percentage formula approved for downhole commingling be used for the allocation of surface commingled production. The allocation of production would be as follows:

Fulcher Kutz Pictured Cliffs Pool	Oil	0%	Gas	55%
Basin Dakota Pool	Oil	100%	Gas	45%

14. I hereby certify that the foregoing is true and correct
