A blank sheet of graph paper with a grid pattern. The grid consists of small squares formed by thin black lines. There are approximately 20 columns and 20 rows of squares. A thicker vertical line runs down the center, dividing the grid into two equal halves. A thicker horizontal line runs across the middle, also dividing the grid into two equal halves. These two thicker lines intersect at the center of the page.

It is of the greatest importance to have a complete history of the well. Please state in detail the dates of re-dilling, together with the reasons for the work and its results. If there were any changes made in the casing, state fully, and if any casing was "sidetracked" or left in the well, give its size and location. If the well has been dynamited, give date, size, position, and number of shots. If plugs or bridges were put in to test for water, state kind of material used, position, and reason for plugging or building.
