Union Oil Company of California proposes to plug and abandon Jicarilla (H9) Well No. 1 because it is uneconomic to produce. The well was drilled in 1986 and was shut in upon completion on 11-17-86 after testing the Pictured Cliffs and Fruitland zones. Union proposes to plug Jicarilla Well No. 1-H9 in such a manner that the Jicarilla Apache Tribe can convert it to a water well (per the tribe's request).

Proposed Plan of Procedure - Revised

1. MIRU pulling unit. Blow down 2-7/8" x 10-3/4" annulus. R.U. lubricator and retrieve B.P. valve. Bleed off T.P. as required.

(The Jicarilla Apache's have requested that no further reclamation work be done to the existing road and location. They want the road and location for their use. The tribe will utilize the top 1000 feet of the wellbore as a fresh water well.)
