250'  
Mallon proposes to change the surface casing depth to 160 ft with cement circulated to surface. Mallon Oil Company feels that 160 ft of surface casing will be more than adequate to protect any shallow water aquifers. Previous wells drilled by Robert L. Bayless in the East Blanco field utilized surface casing depths from 110'-160'. In the past year through our drilling program we have not encountered any water through or below these depths.
