U. S. GEOLOGICAL SURVEY
FARMINGTON, NEW MEXICO

August 20, 1963

Well No. 28 is located 660 ft. from N line and 1980 ft. from E line of sec. 33

33 1/4 Sec. 33 T28N R17E W10E
(4 Sec. and Sec. No.) (Twp.) (Range) (Meridian)

Table Mesa Santa Juan County New Mexico
(Field) (County or Subdivision) (State or Territory)

The elevation of the derrick floor above sea level is 5378 ft.

DETAILS OF WORK

(State names of and expected depths to objective sands; show sizes, weights, and lengths of proposed casings; indicate mudding jobs, cementing points, and all other important proposed work)

We propose to drill this well with rotary tools to approximately 7300' to test the Table Mesa Zone of the Pennsylvanian formation. Approximately 500' of 13 3/8" surface casing will be run and cemented to surface. Approximately 5100' of 9 5/8" intermediate casing will be run and cemented with 400 sacks to cover the Dakota formation. A 7" liner will be hung from the bottom of the 9 5/8" to approximately 7050' and cemented. If commercial production is encountered, a string of 4 1/2" production casing will be run and cemented and the well completed.

I understand that this plan of work must receive approval in writing by the Geological Survey before operations may be commenced.
