DETAILS OF WORK

(State names of and expected depths to objective sands; show sizes, weights, and lengths of proposed casings; indicate mudding jobs, cementing points, and all other important proposed work)

On October 15, 1951, Notice of Intention to Drill well through the Dakota formation with rotary and cable tools, was given.

The plans have now been altered, and it is intended to set 7" casing on top of the Dakota and drill in with Rotary tools. The formation will be cored, using diamond core bit.

I understand that this plan of work must receive approval in writing by the Geological Survey before operations may be commenced.
