17. DESCRIBE PROPOSED OR COMPLETED OPERATIONS (Clearly state all pertinent details, and give pertinent dates, including estimated date of starting any proposed work. If well is directionally drilled, give subsurface locations and measured and true vertical depths for all markers and zones pertinent to this work.)*

Due to a water flood type reaction to water injection into S.E. Cha Cha #37, S.E. Cha Cha wells #19, 23, & 24 are currently producing $\pm$ 70 bbls oil per day as compared to 27 bbls oil per day in May, 1986. Because of this we have revised our plan to P & A this well and are considering injection of water into other areas of the unit. Plugging this well prematurely may cause a loss of potentially recoverable reserves.
