ABANDONMENT*

17. DESCRIBE PROPOSED OR COMPLETED OPERATIONS (Clearly state all pertinent details, and give pertinent dates, including estimated date of starting any proposed work. If well is directionally drilled, give subsurface locations and measured and true vertical depths for all markers and zones pertinent to this work.)*

The subject well was completed as a salt water disposal in the Mesaverde through perforations 3,320'-3,350'. This interval of the Mesaverde will not accept the required volumes of water at a pressure below the maximum pressure allowed by the State of New Mexico. Therefore, Energy Reserves Group, Inc., proposes to perforate additional zones in the Mesaverde as required to dispose of the water.
