17. DESCRIBE PROPOSED OR COMPLETED OPERATIONS (Clearly state all pertinent details, and give pertinent dates, including estimated date of starting any proposed work. If well is directionally drilled, give subsurface locations and measured and true vertical depths for all markers and zones pertinent to this work.)*

Gallegos Canyon Unit #266 was previously PXA May 12, 1973.

Amoco Production Company plans to replug and abandon the Gallegos Canyon Unit #266 due to emissions of small amounts of natural gas through the 4-1/2" casing.

This will be done by installing a BOP to the wellhead and drilling out cement to the location of gas entering the plugged well bore or the previous TD of 3183. The well bore will then be re-cemented in plugs to the surface, and a PXA marker will be re-installed.

U.S.G.S. verbal approval received 5/6/80 per telecon Kadillak to Swanson.
