Well No. 2 is located 1750 ft. from S line and 1560 ft. from W line of sec. 35SW/4 Section 35
(1/4 Sec. and Sec. No.)25N
(Twp.)10E
(Range)N. M. P. M.
(Meridian)Wilcox
(Field)San Juan
(County or Subdivision)New Mexico
(State or Territory)The elevation of the derrick floor above sea level is 7122 ft.

DETAILS OF WORK

(State names of and expected depths to objective sands; show sizes, weights, and lengths of proposed casings; indicate mudding jobs, cementing points, and all other important proposed work)

This well was drilled through the Mancosque formation. 7" casing was set at 5736', and the pay section was shut with 2 quarts of S.H.A. per foot. The gas production was too small to be gauged and the well would not clean up.

It is intended to set a bridge plug at 4100'. A 50' cement plug will be placed on top of the bridge plug. The 7" casing will be perforated with bullets from 3950' to 3900' to test the Flamingo Cliffs formation.

I understand that this plan of work must receive approval in writing by the Geological Survey before operations may be commenced.
