Extended Dakota Production Forecast  
On the San Juan 29-6 unit #88  
Unit L, 2460' SL & 850' FWL, Sec. 33, 29N 6W  
API # 30-039-07491

Dear Mr. Hayden:

About a year ago we submitted a Dakota Forecast on this well that would be good through November 2000. We didn't commingle the well until 9/8/00, therefore more forecast data is needed to have our paperwork coincide. Phillips still plans for using the subtraction method for this well for approximately twelve months starting with September 2000. After the 12<sup>th</sup> month we will convert to the ratio method as indicated in our commingling application.

*Dakota?*

Pictured Cliffs Production Forecast

September 2000 – 1,442	October 2000 – 1,484	November 2000 – 1,430
December – 2000 – 1,456	January 2001 – 1,450	February 2001 – 1,444
March 2001 – 1,438	April 2001 – 1,432	May 2001 – 1,426
June 2001 – 1,420	July 2001 – 1,415	August 2001 – 1,409

If you have any questions, please call me at 599-3429.

Sincerely,

PHILLIPS PETROLEUM COMPANY
