13. Describe Proposed or Completed Operation (clearly state all pertinent details, including estimated starting date of any proposed work and approximate duration thereof. If the proposal is to deepen directionally or recompleat horizontally, give subsurface locations and measured and true vertical depths of all pertinent markers and zones. Attach the Bond under which the work will be performed or provide the Bond No. on file with BLM/BIA. Required subsequent reports shall be filed within 30 days following completion of the involved operations. If the operation results in a multiple completion or recompleat in a new interval, a Form 3160-4 shall be filed once testing has been completed. Final Abandonment Notices shall be filed only after all requirements, including reclamation, have been completed, and the operator has determined that the site is ready for final inspection.)

Due to a sudden increase in production we decided to run a gas analysis on this well to determine if it was MV or PC production. We shut-in this well after running this tests because it looks like it may be coalseam gas. Phillips is planning on scheduling an Audio log be run to determine where the gas is coming from. If we have a casing leak, we will remediate with cement by squeezing thru the leak. If the gas is migrating down to the PC perfs, we will shot squeeze holes in the FC interval and remeidate with cement.

Plans are to TA the PC interval at the same time and make this a MV well only (if it is determined that the PC interval is still unproductive).

14. I hereby certify that the foregoing is true and correct.
