SI approval

13. Describe Proposed or Completed Operation (clearly state all pertinent details, including estimated starting date of any proposed work and approximate duration thereof. If the proposal is to deepen directionally or recomplete horizontally, give subsurface locations and measured and true vertical depths of all pertinent markers and zones. Attach the Bond under which the work will be performed or provide the Bond No. on file with BLM/BIA. Required subsequent reports shall be filed within 30 days following completion of the involved operations. If the operation results in a multiple completion or recompletion in a new interval, a Form 3160-4 shall be filed once testing has been completed. Final Abandonment Notices shall be filed only after all requirements, including reclamation, have been completed, and the operator has determined that the final site is ready for final inspection.)

Phillips is planning on recompleting this well in the near future, if time permits it will be done this year. We are planning on adding the Mesaverde interval, but we are still evaluating the Dakota interval's potential. We wish to request approval to keep this well shut-in until details of the recompletion can be finalized and approved. Phillips will submit a notice of intent before the workover begins.
