Extended Dakota Production Forecast
On the San Juan 29-6 Unit #77
Unit H, 1850' FNL. & 990' FEL, Sec. 22 T29N R6W
API # - 30-039-07581

Dar Mr. Hayden:

A year ago we submitted a Dakota Forecast on this well good through November 2000. We didn't commingle the well until 10/3/00, therefore more forecast data is needed to have our paperwork coincide. Phillips still plans on using the subtraction method for this well for approximately twelve months starting with October 2000. After the 12th month period we will convert to the ratio method as indicated in our commingling application.

Dakota Production Forecast

| | | | |
|---------------|-------|---------------|-------|
| October 2000 | 1,547 | November 2000 | 1,491 |
| December 2000 | 1,534 | January 2001 | 1,527 |
| February 2001 | 1,374 | March 2001 | 1,515 |
| April 2001 | 1,460 | May 2001 | 1,503 |
| June 2001 | 1,448 | July 2001 | 1,490 |
| August 2001 | 1,484 | September | 1,430 |

If you have any questions, please call me at 505-599-3455.

Sincerely,

PHILLIPS PETROLEUM COMPANY
