☐ Deepen

☐ Fracture Treat

☐ New Construction

☐ Plug and Abandon

☐ Plug Back

☐ Production (Start/Resume)

☐ Reclamation

☐ Recomplete

☐ Temporarily Abandon

☐ Water Disposal

☐ Water Shut-Off

☐ Well Integrity

☒ Other Add MV pay

to Dakota Well

13. Describe Proposed or Completed Operation (clearly state all pertinent details, including estimated starting date of any proposed work and approximate duration thereof. If the proposal is to deepen directionally or recompleat horizontally, give subsurface locations and measured and true vertical depths of all pertinent markers and zones. Attach the Bond under which the work will be performed or provide the Bond No. on file with BLM/BIA. Required subsequent reports shall be filed within 30 days following completion of the involved operations. If the operation results in a multiple completion or recompleat in a new interval, a Form 3160-4 shall be filed once testing has been completed. Final Abandonment Notices shall be filed only after all requirements, including reclamation, have been completed, and the operator has determined that the final site is ready for final inspection.)

Plans are to add the Mesaverde interval to the existing Dakota well and then commingle production from both zones per DHC Order 11187. The individual DHC application sundry detailing the DK forecast will be filed and approved before actual commingling occurs. Brief details of the procedure we will use are as follows:

MIRU. COOH w/production tubing. Isolate existing Dakota interval with bridge plug. Pressure test the casing and remediate with cement if casing fails pressure test. Run GR/CCL/CBL and remediate with cement if the interval completing isn't adequately covered. Perforate and stimulate the Mesaverde. Remove bridge plugs and return well to production with the Mesaverde and Dakota commingled.

14. I hereby certify that the foregoing is true and correct
