RE: San Juan 29-7 Unit #63, H-10-29N-07W

Dear Dave:

The enclosed copy of the 1993 Bradenhead Test on the referenced well indicates the bottom spool has not been dug out. Our Records show the well has 7 5/8" casing at 3441' and a full string of 5 1/2" at 5647'. A review of past records shows the well was not dug out in 1990 and has probably never been properly tested. Please dig out, reschedule and retest the well prior to the end of the 1993 test period, November 1.

Notify this office 24 hours prior to the test so we may provide a witness.

Yours truly,

Charles Gholson
Deputy Oil & Gas Inspector
