SPECIAL USE PERMIT

Act of June 4, 1897
This permit is revocable and nontransferable
(Ref. FSM 2710)

c. Record no. (1-3) <u>70</u>	b. Region (3-4) <u>03</u>	a. Forest (5-6) <u>02</u>
d. District (7-8) <u>03</u>	e. Use number (9-12) <u>2724</u>	f. Kind of use (13-15) <u>420</u>
g. State (16-17) <u>35</u>	h. County (18-20) <u>039</u>	k. Cord no. (21) <u>1</u>

Permission is hereby granted to c/o John E. Schalk, Lone Star Industries
of P.O. Box 2078, Farmington, New Mexico 87401
hereinafter called the permittee, to use subject to the conditions set out below, the following described lands
or improvements:

A one acre tract in the SW 1/4 NW 1/4 section 24 and a temporary access road
through SW 1/4 NW 1/4 and the NW 1/4 SW 1/4 section 24 T29N R5W NMPM as shown
on the attached map.

This permit covers 1 acres and/or No miles and is issued for the purpose of:

1. Constructing, drilling and producing the Lone Star Schalk 52-3 gas well
located 2418 FNL and 858 FWL under terms of Lease NM 4452.

2. Constructing, using and closing, temporary access road thereto.

1. Construction or occupancy and use under this permit shall begin within 1 months, and
construction, if any, shall be completed within 12 months, from the date of the permit. This
use shall be actually exercised at least 365 days each year, unless otherwise authorized
in writing.

2. In consideration for this use, the permittee shall pay to the Forest Service, U.S. Department of
Agriculture, the sum of Free 36 CFR 251.2 Dollars (\$) for the period
from 19 , to , 19 , and thereafter
annually on Dollars (\$);

Provided, however, Charges for this use may be made or readjusted whenever necessary to place the
charges on a basis commensurate with the value of use authorized by this permit.

3. This permit is accepted subject to the conditions set forth herein, and to conditions 18 to
38 attached hereto and made a part of this permit.

PERMITTEE	NAME OF PERMITTEE <u>Lone Star Industries</u> <u>John Schalk</u>	SIGNATURE OF AUTHORIZED OFFICER <u>[Signature]</u>	DATE <u>11/17/73</u>
	NAME AND SIGNATURE <u>W.R. Snyder</u>	TITLE <u>Forest Supervisor</u>	DATE <u>11/16/73</u>

(CONTINUED ON REVERSE)

development plans; layout plans; or revision of layout or construction plans for this area must be approved in advance and in writing by the forest supervisor. Trees or shrubbery on the permitted area may be removed or destroyed only after the forest officer in charge has approved, and has marked or otherwise designated that which may be removed or destroyed. Timber cut or destroyed will be paid for by the permittee as follows: Merchantable timber at appraised value; young-growth timber below merchantable size at current damage appraisal value; *provided* that the Forest Service reserves the right to dispose of the merchantable timber to others than the permittee at no stumpage cost to the permittee. Trees, shrubs, and other plants may be planted in such manner and in such places about the premises as may be approved by the forest officer in charge.

5. The permittee shall maintain the improvements and premises to standards of repair, orderliness, neatness, sanitation, and safety acceptable to the forest officer in charge.

6. This permit is subject to all valid claims.

7. The permittee, in exercising the privileges granted by this permit, shall comply with the regulations of the Department of Agriculture and all Federal, State, county, and municipal laws, ordinances, or regulations which are applicable to the area or operations covered by this permit.

8. The permittee shall take all reasonable precautions to prevent and suppress forest fires. No material shall be disposed of by burning in open fires during the closed season established by law or regulation without a written permit from the forest officer in charge or his authorized agent.

9. The permittee shall exercise diligence in protecting from damage the land and property of the United States covered by and used in connection with this permit, and shall pay the United States for any damage resulting from negligence or from the violation of the terms of this permit or of any law or regulation applicable to the national forests by the permittee, or by any agents or employees of the permittee acting within the scope of their agency or employment.

10. The permittee shall fully repair all damage, other than ordinary wear and tear, to national forest roads and trails caused by the permittee in the exercise of the privilege granted by this permit.

11. No Member of or Delegate to Congress or Resident Commissioner shall be admitted to any share or part of this agreement or to any benefit that may arise herefrom unless it is made with a corporation for its general benefit.

12. Upon abandonment, termination, revocation, or cancellation of this permit, the permittee shall remove within a reasonable time all structures and improvements except those owned by the United States, and shall restore the site, unless otherwise agreed upon in writing or in this permit. If the permittee fails to remove all such structures or improvements within a reasonable period, they shall become the property of the United States, but that will not relieve the permittee of liability for the cost of their removal and restoration of the site.

13. This permit is not transferable. If the permittee through voluntary sale or transfer, or through enforcement of contract, foreclosure, tax sale, or other valid legal proceeding shall cease to be the owner of the physical improvements other than those owned by the United States situated on the land described in this permit and is unable to furnish adequate proof of ability to redeem or otherwise reestablish title to said improvements, this permit shall be subject to cancellation. But if the person to whom title to said improvements shall have been transferred in either manner provided is qualified as a permittee and is willing that his future occupancy of the premises shall be subject to such new conditions and stipulations as existing or prospective circumstances may warrant, his continued occupancy of the premises may be authorized by permit to him if, in the opinion of the issuing officer or his successor, issuance of a permit is desirable and in the public interest.

14. In case of change of address, the permittee shall immediately notify the forest supervisor.

15. The temporary use and occupancy of the premises and improvements herein described may be sublet by the permittee to third parties only with the prior written approval of the forest supervisor but the permittee shall continue to be responsible for compliance with all conditions of this permit by persons to whom such premises may be sublet.

16. This permit may be terminated upon breach of any of the conditions herein or at the discretion of the regional forester or the Chief, Forest Service.

17. In the event of any conflict between any of the preceding printed clauses or any provisions thereof and

18. As a further guarantee of the faithful performance of the provisions of the permittee's special use permits for oil and gas exploration on the Carson National Forest, the permittee has delivered and agrees to maintain a surety bond in the amount of ten thousand dollars (\$10,000.00). Should the sureties or bonds delivered under this permit become unsatisfactory to the Forest Service, the permittee shall, within thirty (30) days of demand, furnish a new bond with surety, solvent and satisfactory to the Forest Service.

The permittee agrees that all moneys deposited under these permits may, upon failure on his part to fulfill all and singular the requirements herein set forth or made a part hereof, be retained by the United States to be applied as far as may be to the satisfaction of his obligations assumed hereunder, without prejudice whatever to any other rights and remedies of the United States.

19. Chemical materials may not be used to control undesirable woody and herbaceous vegetation, insects, rodents, etc., without the prior written approval of the Forest Service. A report of planned use of pesticides will be submitted annually by the permittee on the due date established by the District Ranger. The report will cover a 12 month period of planned use beginning 3 months after the reporting date. Information essential for review will be provided in the form specified. Exceptions to this schedule may be allowed only when unexpected outbreaks of pests require control measures which were not anticipated at the time the annual report was submitted.
20. This permit shall have no force or effect until the permittee has signified his acceptance of its provisions and conditions by signing the original and all carbon copies and returning the copies to the District Ranger.
21. A muffler or spark arrester satisfactory to the Forest Service shall be maintained on the exhausts of all trucks and tractors or other internal combustion engines used in connection with this permit.

The permittee will make arrangements to have all equipment inspected for compliance with fire requirements prior to entry onto the National Forest. In addition to an adequate muffler or spark arrester all vehicles or equipment will have a shovel. All heavy equipment and vehicles except sedans and pickups will also be equipped with a fire extinguisher.

Each drilling rig will be equipped with adequate fire extinguishers and a tool cache containing a minimum of 3 shovels and 2 axes.

22. The permittee shall save the United States harmless from and indemnified against claims for injury to persons or damages to property, due to development, operation or use under this permit.

23. All liquids and solids discharged from the well will be vented into storage tanks or fenced drip pits. The permittee will provide that the location and all equipment will be kept in satisfactory condition to prevent damage to livestock and wildlife.
24. The permittee shall take all practicable precautions to minimize damage to the soil, and to prevent the creation of conditions conducive to continuing or accelerated soil erosion. The precautions may include but shall not necessarily be limited to, bank sloping, benching, wattling, sod planting, seeding, fertilizing, and mulching as determined by the District Ranger to be practicable and necessary. All earth cuts or fill slopes on any disturbed areas which are favorable to revegetation or other areas on which the soil and/or ground cover is destroyed in the course of construction, will be revegetated with suitable vegetation or otherwise treated by the permittee as required by the District Ranger. Such seeding or planting shall be done at a time of the year, in a manner, and with the kinds and amounts of species which in the opinion of the District Ranger offers the best chance of success.
25. A chemical toilet or similar adequate sanitary facilities will be provided on the location while men are regularly employed there. Untreated sewage will not be permitted to enter any stream course.
26. If, during construction, items of a substantial archaeological or paleontological value are discovered, or a known deposit of such items is disturbed, the permittee will cease work in the area so affected. He will then notify the District Ranger and will not resume work until written approval is given.
27. This permit authorizes only such use and occupancy of National Forest land as is essential for purposes directly connected with the construction, maintenance, and use of the road and well site. It does not authorize uses such as borrow pits, stockpiles, quarries or any other similar use except with the written approval of the District Ranger.
28. All or portions of the work herein described for revegetation, brush disposal, fence construction and/or reseeding for which the permittee is responsible, may upon written request of the permittee and approval by the Forest Supervisor be performed by the Forest Service on a operative or assistance basis under Section 5, Act of April 24, 1959, 64 Stat. 83, U.S.C. 572. When the work is to be so performed, the permittee shall make advance deposits as requested by the Forest Service. The total deposits will be sufficient to cover the cost of the work including necessary overhead charges. Deposits for the control of erosion may be used to maintain installations made for erosion control for a period not to exceed three years or until site stabilization is accomplished, whichever is less. Advance estimates of the cost of this work may be obtained from the District Ranger.

29. The road will be constructed in accordance with the specifications set forth in Exhibit I. Cuts in earth will not be steeper than 2:1, cuts in rock will not be steeper than 1/4:1. Fill material will not be steeper than 2:1. All roads will be ditched and crowned with adequate wing ditches and culverts for proper ditch relief.
30. This road will be maintained a minimum of twice each year. To insure proper care of the improvements, the District Ranger may require more frequent maintenance.
31. To protect vegetation and prevent scorching of top soil, drilling gas will be burned in a pit and against a dirt bank.
32. Gates, cattleguards, culverts and other structures installed as part of this road shall become the property of the United States and may not be removed without the consent of the District Ranger. The Forest Service, or its cooperator, (with Forest Service consent) may improve this road in any manner so long as it does not materially interfere with its use by the permittee. Specifications for construction of these improvements are given in Exhibit 2.
33. None of the conditions of the permit as set forth herein can be varied or modified, except with the written consent of the District Ranger.
34. If the use granted under this permit is not exercised within one calendar year from date of issue the permit will be terminated.
35. The prescribed seed mixture for revegetation of disturbed areas is shown in Exhibit #3.
36. All construction slash will be buried, chipped or removed.
37. When roads become dry and dusty they will be watered to reduce rutting, improve visibility and reduce air pollution.
38. Construction at the site shall be in accordance with the specifications set forth in exhibit #4, attached hereto.

52-3

Exhibit 1

The existing closed road will be used for temporary access. Maintenance will be restricted to light blading of a 14' wide section. No ditches will be cut.

Exhibit 2

No culverts or cattleguards will be installed.

Exhibit 3

The prescribed seed mixture for revegetation of disturbed areas is:

Pubescent Wheat Grass	6 lbs. per acre
Sand Drop Seed	1 lb. per acre
Fourwing salt bush	5 lbs. per acre

EXHIBIT #4

1. No equipment will be allowed on slopes in excess of 20 percent. Clearing limits will be flagged by the Forest Officer. To reduce cut and fill it may be necessary to construct the well location on more than one level.
2. The permittee will provide a copy of the Highway Access Agreement.
3. No pits, dehydrators, storage tanks or other such improvements will be allowed on the site. These will be located at the end of the pipeline on the 52-1 location. Any necessary valves or appurtenances will be below ground level or as low as safety regulations will allow.
4. As soon as the drilling operation and testing is completed all liquids will be removed from pits and the location cleaned up completely.

Following completion of the well, all temporary roads will be closed and dirt will be backfilled against all cut banks.

5. Seeding will be repeated as often as necessary to establish an adequate ground cover. If the Highway right-of-way is not fenced the permittee will fence all seeded areas. Planting of trees and shrubs may be required to screen the well locations.
6. Organic trash generated during drilling operations will be buried in the mud pit.
