NM Oil & Gas Conservation Division  
Attn: Steve Hayden  
1000 Rio Bravos Rd.  
Aztec, NM 87410

Dear Mr. Hayden:

Extended Pictured Cliffs Production Forecast  
On the San Juan 29-6 unit #53A  
Unit O, 880' FSL & 1570' FEL, Sec. 31, 29N 6W  
API # 30-039-21086

About a year ago we submitted a Pictured Cliffs Forecast on this well that would be good through November 2000. We didn't commingle the well until 4/11/00, therefore more forecast data is needed to have our paperwork coincide. Phillips still plans for using the subtraction method for this well for approximately twelve months starting with April 2000. After the 12<sup>th</sup> month we will convert to the ratio method as indicated in our commingling application.

### Pictured Cliffs Production Forecast

April 2000 – 12,228	May 2000 – 12,364	June 2000 – 11,870
July 2000 – 11,839	August 2000 – 11,586	September 2000 – 11,128
October 2000 – 11,105	November 2000 – 10,669	December – 2000 – 10,800
January 2001 – 10,755	February 2001 – 10,711	March 2001 – 10,666

If you have any questions, please call me at 599-3429.

Sincerely,

PHILLIPS PETROLEUM COMPANY
